

# TRAVEL SECURE

## TOP TIPS TO #PROTECTYOURTECH

Whether traveling for work or pleasure, a connected world means connected devices, even when you're on the road.

- ✓ Notify your IT team about your intended travel
- ✓ Keep your mobile software updated
- ✓ Disable 'autoconnect' to avoid unintended connections
- ✓ Avoid using public WiFi for sensitive work, but if you must, activate your VPN
- ✓ Don't leave devices unattended in public space or hotel rooms
- ✓ Stay alert, do not click on suspicious links, webpages, or push notifications
- ✓ After vacation, notify IT, [#checkyourtech](#) and restore your settings

Enjoy your travel and feel confident in every connected and disconnected moment.
